HoverApps® HT-Roller™
Lateral Turning Device

Frequent turning and positioning is critical for bed-bound patients, yet it is often challenging for caregivers to manage these patient handling tasks that require significant time and physical effort. To address these concerns, HoverTech has designed the HT-Roller™ Lateral Turning Device for easy and efficient lateral patient turning. The HT-Roller comprises two inflatable chambers that are controlled by the clinician to achieve optimal positioning for patient care. By eliminating the need for manual lifting, the HT-Roller protects both the staff from injury and the patient from friction and shearing associated with traditional repositioning methods.

HoverApps® HT-Roller™ Device Benefits:

- Turning chambers provide periodic pressure relief from bony prominences
- Adjustable positioning facilitates better access for hygiene and wound care applications
- Quick release valves allow for rapid deflation of turning chambers
- Breathable fabric prevents moisture build-up and enhances patient comfort
- Disposable device eliminates the need for reprocessing and reduces potential for cross contamination
- Variable speed Air Supply allows caregiver to control inflation for patient safety and comfort
HoverApps® HT-Roller™ Lateral Turning Device

Product Specifications

**Material Specs**
- Non-woven polypropylene fiber
- RF welding on all seams
- Latex free

**Dimensions**
- Chambers: 44”L x 44”W
- Apron: 44”L x 70”W

**Model Number**
- HTR-100

**Packaging**
- 5 per box

**Compatible with HoverTech Air Supplies**
- HTAIR1200 (Variable Speed - 120 V) and HTAIR2300 (Variable Speed - 230 V)

**Patents Pending**
